

This project is provided for in the Hydrological Plan for the Tajo basin, as well as in the general protocol, signed in 2009, which established the general framework for collaboration in the field of sewage and wastewater treatment, as part of the implementation of the National Water Quality Plan: Sewage and Wastewater Treatment 2007-2015.

This project is Co-financed by the **European Regional Development Fund ERDF 2014-2020**, within the **Spanish Multi-regional Operational Programme (POPE)**, it contributes to the conservation of the environment and cultural heritage.

With these new facilities, water purification is guaranteed even during peak flows and high season. Thanks to the contribution of the ERDF fund, the treated water will comply with the specifications of the European regulations on wastewater treatment, reducing the generation of gases and odours and minimising negative effects on both the environment and the surrounding public water domain, as well as improving water quality.

Investment: 6.3 million euros

Equivalent population: 15,963 inhabitants

PROJECT AND IMPLEMENTATION OF THE SEWAGE AND WASTEWATER TREATMENT OF THE AGRICULTURAL REGION OF HERVÁS IN THE MUNICIPALITIES OF BAÑOS DE MONTEMAYOR, LA GARGANTA AND HERVÁS (CÁCERES)

"A way to make Europe"

THIS PROJECT, CO-FINANCED BY THE EUROPEAN REGIONAL DEVELOPMENT FUND ERDF 2014-2020, WITHIN SPAIN'S MULTIREGIONAL OPERATIONAL PROGRAMME (POPE), CONTRIBUTES TO THE CONSERVATION OF THE ENVIRONMENT AND CULTURAL HERITAGE

Contribution from the ERDF Fund

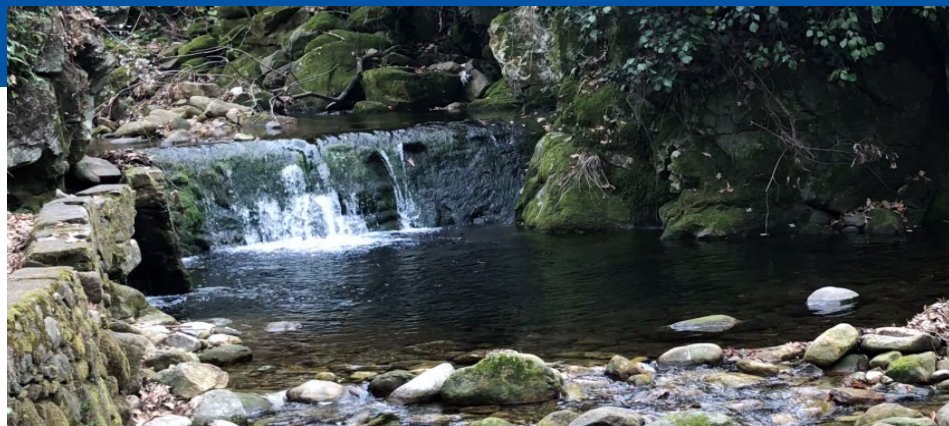

The project in the agricultural region of Hervás involves an improvement in the sewage and wastewater treatment in La Garganta, Baños de Montemayor and Hervás.

For an investment of 6.3 million euros, the European Regional Development Fund (ERDF) is co-financing the project in 80%.

The aim of the project is to ensure 100% compliance with the requirements of Council Directive 91/271/EEC of 21 May 1991 concerning urban waste water treatment.

In order to meet society's current demand, the Ministry for Ecological Transition and Demographic Challenge (MITERD) is carrying out the PROJECT AND IMPLEMENTATION OF THE SEWAGE AND WASTEWATER TREATMENT IN THE AGRICULTURAL REGION OF HERVÁS IN THE MUNICIPALITIES OF BAÑOS DE MONTEMAYOR, LA GARGANTA AND HERVÁS (CÁCERES).

Europe cleans up our waters

Project

The planned works consist of the construction of:

- The Wastewater Treatment Plant (WWTP) of Hervás
- Unification of wastewater discharges of the urban district of La Garganta and connection to the sewage network of Baños de Montemayor.
- Unification of wastewater discharges from the urban area of Baños de Montemayor and diversion of its current outfall to the waste water treatment plant.
- Pumping of wastewater from the Hervás industrial zone to the the new sewage treatment plant.

Profit made

- The objective of the action is to ensure a percentage of 100% compliance with the requirements of Directive 91/271/EEC of the Council, of May 21, 1991, on the treatment of urban wastewater
- Reduction of negative effects on the environment and the Public Water Domain
- Reduction of gas generation and bad odors
- Improvement of water quality
